

JEEVITHA L SHETTY

+91-9113098548 jeevitha3shetty@gmail.com linkedin.com/in/jeevithalshetty github.com/jeevithalshetty

Summary

Highly motivated 3rd-year Computer Science student with expertise in C, C++, Java, Data Structures & Algorithms, Machine Learning, and Web Development. Eager to gain practical industry experience and build impactful, real-world software solutions.

Education

B.Tech in Computer Science Engineering

REVA University, Bengaluru

2023 – 2027

CGPA: 9.342 / 10

Pre-University Education

Narayana PU College, Bengaluru

2021 – 2023

Percentage: 95.3%

ICSE – Secondary School Education

Shantidhama International Public School, Bengaluru

2011 – 2021

Percentage: 96%

Skills

Programming & Querying: SQL, Python, C, C++, Java, JavaScript, HTML, SpringBoot(basics)

Frameworks & Tools: React.js, Node.js, Express.js, Git, Postman, VS Code, Linux (Basics), MS Excel, MongoDB, RestAPI, JWT, AWS(EC2), docker(basics)

Coursework: Data Structures & Algorithms, DBMS, Machine Learning, Operating Systems, Computer Networks

Projects

EcoSwap Platform | Node.js, Firebase

July 2025 – August 2025

- Built the “Add New Item” feature using secure **CRUD REST APIs**, managing separate collections for users and items.
- Ensured scalable and reliable data handling for large datasets and high-volume transactions.

Virtual Water Trading Platform | MongoDB, Node.js, Express.js

January 2025 – February 2025

- Developed a CORS-enabled Node.js/Express backend with scalable workflows to securely manage users, transactions, and logistics data.
- Implemented real-time GPS tracking using **Socket.IO (WebSockets)** and Google Maps API, enabling live delivery tracking.
- Integrated secure user authentication for role-based access (Admin, User, Transporter)

URL Phishing Prevention Plugin | JavaScript

March 2025

- Developed a **machine learning-based phishing detection system** that classifies URLs as legitimate or malicious.
- Built using multiple ML models including **Neural Network (MLPClassifier)**, **Random Forest**, and **SVM** for performance comparison.
- Focused on extracting **16 intelligent URL and domain-based features** to improve phishing detection accuracy.
- Evaluated models using **Accuracy, F1-score, Confusion Matrix, Sensitivity**.

AI-Powered Honey Trap Detection & Cyber Threat Intelligence System.

August 2025

- Engineered an AI-Powered Honey Trap Detection & Cyber Threat Intelligence System to identify social engineering attacks, romance scams, and manipulative voice-based interactions.
- Integrated the **Vosk Speech Recognition Model** for real-time offline speech-to-text conversion during audio/video calls.
- Built a real-time NLP pipeline to classify spoken conversations into categories such as **honeytrap, spam, job fraud, and safe** communication using confidence-based prediction models.

ACGR-Based Product Rating Prediction

February 2026

- Developed an **ACGR (Aspect-Contrastive Graph-Regularized Regressor)-based AI system** for product rating prediction using **PySpark and NLP**.
- Leveraged **TF-IDF, KMeans aspect clustering, and ACGR regression modeling** for accurate review-based rating prediction.
- Combined **sentiment analysis, text semantics, and product behavior features** to enhance prediction performance.

- Processed **50K+ customer reviews** efficiently using distributed big data architecture with PySpark.
- Built a **scalable enterprise-ready solution** for e-commerce sentiment analytics and product performance insights.

Certifications

- **IBM – Fundamentals of Artificial Intelligence & Data Science:** Core concepts of AI, ML, data analysis, preprocessing, and visualization.
- **Postman API Fundamentals – Student Expert:** REST API testing, request validation, automated workflows.
- **Oracle Java Foundations:** Object-oriented programming, core Java concepts, problem-solving.
- **Scalers React.js**

Achievements

- Runner-Up at **Hack Nocturne**, Sir M. Visvesvaraya Institute of Technology.
- Top 15 Finalists at **HackSky 2025** among 600+ teams (**MITB ACM** × **Kaspersky**).
- Top 10 Finalists at **Hack Horizon 2.0**, REVA University.
- Top 10 Finalists at Namma Hack conducted by **Google Developer Group**, Reva University

Leadership and Organization

- Active member of the **Dev Track Coding** Club during 2nd year, contributing to technical learning initiatives, innovation-driven activities, and collaborative development projects.
- Promoted to **Core Member** in 3rd year based on technical contribution, leadership, and active involvement in mentoring and community activities.
- Mentored and guided students in the **Full Stack Web Development** domain, assisting with frontend/backend development concepts, project building, and technical problem-solving.
